May 2018

Dear Reserve on the Eagle River Residents,

In light of the increasing rates for water & sewer charges, the fact that these bills make up **almost 29% of your annual operating budget**, and that ERW&SD has told us to expect rate increases each year, your Board of Directors is asking for your cooperation in **water conservation measures**.

Note that if drought conditions continue throughout the summer months, we may be required to cut back on irrigation and you may notice some brown turf areas, even with the new and improved irrigation system.

Please take the following steps whenever possible:

1. Install low flow shower heads and/or toilets
2. Install dual flush toilet kits or place a sealed, plastic container full of water in your tank to use less water with each flush
3. Check all faucets and toilets to make sure they do not leak. Contact your landlord or management immediately if you detect any leaks!
4. **Limit your use of the outdoor water spigots** in the warm weather months; if you wash your car, make sure to use nozzle that does not allow the water to run constantly.
5. Use your garbage disposal (in the sink drain) sparingly.
6. Run dishwashers only when full. Rinsing dishes before washing is not necessary. If you are replacing your dishwasher, purchase an Energy Star rated appliance.
7. Set the water level on your washing machine to match the size of your load. If you are replacing your washer, purchase an Energy Star rated appliance.
8. Turn off the tap when you brush your teeth.

Thank you for your cooperation.
